

Agent Reach Monitoring Pack

Watch. Alert. Act.

ErgeneAI

Ch 1: Multi-Platform Monitoring

Monitor X, Reddit, GitHub, Telegram, and web in one dashboard.

Setup

- Install Agent Reach on your server
- Configure platform connections (API keys)
- Define keyword lists for each platform
- Set scan frequency (5 min to 1 hour)
- Deploy webhook receivers

Supported Platforms

- X/Twitter: keyword + account tracking
- Reddit: subreddit + keyword monitoring
- GitHub: repo events + issue tracking
- Telegram: channel + group monitoring
- Web: RSS feeds + page change detection

Ch 2: Keyword Tracking

Track any keyword across all platforms simultaneously.

Keyword Categories

- Brand mentions: your product/service name
- Competitor mentions: rival brands + products
- Opportunity keywords: need help, looking for, recommend
- Market intelligence: industry trends, funding news

Configuration

Keywords in YAML format. Regex support for patterns.

Separate lists per platform

Ch 3: Webhook Configuration

Receive real-time alerts when keywords are detected.

Webhook Types

- Slack webhook: team notifications
- Telegram bot: instant alerts to your channel
- Custom webhook: POST to any URL
- n8n webhook: trigger automation workflows

Payload Structure

Platform | Keyword matched | URL | Timestamp | Confidence score | Full text excerpt

Ch 4: Alert Rules

Smart alerts. No noise.

Rule Examples

- Alert only when 3+ mentions in 1 hour (trending)
- Alert only from accounts with 1k+ followers
- Alert only in specific subreddits/channels
- Mute alerts for known keywords (noise reduction)

Escalation

Low: daily digest | Medium: immediate notification | High: SMS/call

Ch 5: Notification Templates

Pre-built templates for every platform.

Template Structure

Emoji + Platform + Keyword + Link + Timestamp

Example: [X] @user

Customization

Per-platform templates. Different channels for different severities.

Ch 6: Analytics & Reporting

Weekly and monthly reports delivered automatically.

Report Contents

- Total mentions tracked
- Top keywords this period
- Most active platforms
- Trending topics
- Sentiment analysis
- Recommended actions

Delivery

Auto-generated. Sent to Telegram/Slack/Email.
